

## Attention Hitachi Customers!

As you may already know, Hitachi has discontinued the manufacture of print kits for their VY-170 and VY-190 and other privately labeled printers.

As an authorized Hitachi dealer, TELCOR was able to make a "last delivery" of the ending production run. While we still have inventory, these items are going quickly.

We are here to help you, our valued Hitachi customers, to make what we believe to be the most cost effective transition to another brand of printer model and print kit. We offer either the Sony or Mitsubishi models as a seamless replacement for your Hitachi printer with the following advantages:

- Continue to use your existing camera system
- Enjoy a faster 20 second print cycle
- Improved image & color management
- Lower cost per print.

Call us today for a professional evaluation of your needs and a quote on the print system that best meets your needs.

**HURRY!** Our existing Hitachi supplies are limited. Don't experience any down time.
